

**Identification of Export Control Classification Number - ITER
(April 2012)**

As the "Shipper of Record" please provide the appropriate Export Control Classification Number (ECCN) for the products (equipment, components and/or materials) and if applicable the nonproprietary associated installation/maintenance documentation that will be shipped from the United States to the ITER International Organization in Cadarache, France or to ITER Members worldwide on behalf of the Company. In rare instances an export control license may be required prior to shipment. If an export control license will be required, the offeror's proposal shall describe the license schedule or any other license conditions that are expected to impact the work.
